

## Command Line Software

Kumpulan beberapa Command line yang biasa saya pakai

### Run xclock & place in top right

```
xclock -geometry 135x32-14+10
```

### Menseting repeat keyboard

```
xset r rate 180 20
```

### Mencari file dengan isi

```
grep -rn '<regex>'
```

### Mencari executable current dir

```
find . -executable
```

### Menghitung jumlah line

```
wc -l
```

### Check ukuran RAM

```
free -h --si
```

### Check ukuran directory

```
du -sh .
```

### Convert Picture

```
magick convert <file>.png <target>.jpg
```

### Auto startx

```
if [ $(tty) = "/dev/tty1" ]
then
    startx > /dev/null 2>&1
fi
```

### Burning ISO

```
dd if=<file>.iso of=/dev/<target> status=progress
```

### Screenshot

```
import -window root png:$HOME/x_$(date "+%Y-%m-%d-%H:%M:%S").png
scrot -p
scrot -ps
```

### Archive

```
tar xf <file>.tar.gz
tar xvf <file>.tar.gz
tar tf <file>.tar.gz
tar cf <file>.tar.gz <file>
```

### Mensetting Volume

```
wpctl set-volume @DEFAULT_AUDIO_SINK@ 5%-
pactl set-sink-volume @DEFAULT_SINK@ -5%
```

### Memulai WindowManager dengan Dbus

```
dbus-run-session -- <WindowManager>
```

### Mengganti Wallpaper (X11)

```
xsetroot -solid "<color>"
hsetroot -fill <image>
feh --bg-fill <image>
```

## Mengganti Kecerahan layar

```
xbacklight -set 50  
brightnessctl s 50%  
light -S 50
```
